PROJECTS

Flight Delay Prediction ⬈ | Python(sklearn, pandas, json, os, numpy matplotlib)   **Dec 2021**

- For a given flight and weather data in the years 2016 and 2017, a two-stage machine learning model was built to predict flight delay.
- In the process, different classification and regression models are studied and experimented to find the best classifier and regressor and the same was to observe the perfomance of the two-stage model.

Wealth Management System ⬈ | Flask(Python), HTML(with Bootstrap), CSS, JavaScript   **Oct 2021**

- A website was built as a part of Software Design Lab in College in the 5th Semester.
- The website takes input details of Asset, Liabilities, Income and Expenditure from the client and predicts the net worth of the client currently and upto 5 years in the future assuming a standard growth percentage.
- Link for website
